1. EXECUTIVE SUMMARY

The website is one of the most important promotional and communication tools of the project. It contains the main aspects of the project, including project objectives, activities and partners involved. In addition, it will serve as the repository for internal and external information of the project, as news, meetings, and so on. The website will be periodically updated with novel information relating to the project progress and ongoing activities for the public and it will also include the deliverables, both public (for general access) and confidential (for consortium members).

2. PROJECT WEBSITE

The website is:

www.remeb-h2020.com
